SUSTAINABILITY FEATURES

Sustainable building initiatives have been incorporated into the design and construction of the George Marine Residences. Some of these features include:

- Concrete construction
- Use of low VOC materials and finishes for better indoor air quality
- Recycled and recyclable materials are used throughout
- Use of energy efficient lighting, appliances and building management systems
- Abundant natural day-lighting
- Water efficient plumbing fixtures and mechanical systems to reduce the amount of potable water used
- Storm water systems to manage quality and quantity of storm-water run-off
- Native planting and water-smart landscaping
- A comprehensive waste and recycling program

Pedestrian walkways, bicycle racks, access to a coast car co-operative program, electric car charging stations and the convenient location just steps to village amenities and transit will help to reduce transportation congestion and increase green-space by reducing the requirements for car parking.
